

Sales Success with AI: Streamline, Collaborate, Win

Hello Everyone !

For my internship project I'm working on this AI-driven assistant for MSX that helps Solution Engineers (SEs) make sense of their deals, pulling together scattered information, creating clear milestones, identifying next steps, and keeping everyone aligned. It also helps streamline collaboration across the team, so handoffs are smoother and everyone stays on the same page.

I'm trying to better understand how this actually fits into your day-to-day. That's why I'm asking you to fill out this form so I can learn how you assess deals, what you prioritize, and how you're really using tools like this in practice.

Your inputs will help me build something that improves your sales experience!

* Required

* This form will record your name, please fill your name.

1. When working on a specific account, where do you struggle most to find or access important information? *

Select up to 2

- ☐ Across multiple tools (CRM, Teams, notes, emails)
- ☐ Spread across different people's knowledge
- ☐ Inconsistent or unclear milestone descriptions
- ☐ Missing history of decisions
- ☐ Lack of structured summaries
- ☐ All of the above
- ☐ Other

2. Additional comments or elaboration (on previous answer)

3. When planning the next steps in a deal, where do you face the most friction? *

Select up to 2

- ☐ Deciding the right next milestone given the current deal context
- ☐ Translating customer priorities into concrete, actionable steps
- ☐ Understanding dependencies and risks that could block progress
- ☐ Adapting milestones when the deal changes (new info, stakeholders, priorities)
- ☐ All of the above
- ☐ Other

4. Additional comments or elaboration (on previous answer)

5. What would make AI-generated milestones actually useful in your workflow? *

Select up to 2

- ☐ Clearly grounded in the current deal context (customer, history, constraints)
- ☐ Explains why each milestone is being suggested
- ☐ Prioritizes what matters most right now
- ☐ Accounts for real constraints (timeline, stakeholders, dependencies)
- ☐ All of the above
- ☐ Other

6. Additional comments or elaboration (on previous answer)

7. What types of information should the assistant prioritize when presenting deal context? *

Select up to 2

- ☐ Customer business problem and priorities
- ☐ Current deal stage and momentum (where the deal stands now)
- ☐ What has already been completed (milestones, actions, outcomes)
- ☐ Key risks or blockers that could impact progress
- ☐ Actionable next steps
- ☐ All of the above
- ☐ Other

8. Additional comments or elaboration (on previous answer)

9. What would make a handoff/collaboration between SEs or teams truly actionable and seamless? *

Select up to 3

- ☐ Clear summary of what has been achieved
- ☐ What remains unclear or risky
- ☐ Recommended next steps
- ☐ Key stakeholders and expectations
- ☐ What should NOT be reworked
- ☐ All of the above
- ☐ Other

10. Additional comments or elaboration (on previous answer)

11. In which scenarios would you realistically use this assistant? *

Select up to 2

- ☐ During collaboration or handoffs across teams
- ☐ Planning next steps or milestones
- ☐ Before a customer interaction (prep, alignment)
- ☐ Reviewing deal progress or risks
- ☐ All of the above
- ☐ Other

12. Additional comments or elaboration (on previous answer)

13. How do you prefer to interact with an AI assistant during your workflow? *

Select up to 2

- ☐ Quick chat (ask questions, get answers instantly)
- ☐ Guided interface (step-by-step flow or prompts)
- ☐ Dashboard view (data, summaries, status at a glance)
- ☐ Mixed experience (chat + structured UI depending on task)
- ☐ All of the above
- ☐ Other

14. Additional comments or elaboration (on previous answer)

15. How should the assistant present insights and recommendations to be most useful? *

Select up to 2

- ☐ Concise summary (short, to the point)
- ☐ Structured sections (clear breakdown: context, risks, next steps)
- ☐ Visual indicators (status, risk levels, priorities)
- ☐ Evidence-linked insights (references to source data, notes, history)
- ☐ Expandable details (high-level first, drill down if needed)
- ☐ All of the above
- ☐ Other

16. Additional comments or elaboration (on previous answer)

17. Where should this assistant be integrated to best fit your workflow? *

Select up to 2

- ☐ Microsoft Teams (chat or channel assistant)
- ☐ Microsoft 365 Copilot (central AI workspace)
- ☐ Inside MSX / CRM (embedded in opportunity view)
- ☐ Dedicated web application
- ☐ Desktop application
- ☐ Other

18. Additional comments or elaboration (on previous answer)

19. How should you primarily interact with the assistant? *

Select up to 2

- ☐ Ask questions in a chat (natural conversation)
- ☐ Receive structured outputs (forms, tables, summaries) without prompting
- ☐ A combination of both
- ☐ Other

20. Additional comments or elaboration (on previous answer)

21. Would it be valuable to receive proactive notifications from the assistant? *

Select up to 2

- ☐ Yes, in Microsoft Teams (e.g., updates, risks, reminders)
- ☐ Yes, only for important events (e.g., blocked deal, approvals needed)
- ☐ Yes, for recommendations (next steps, milestones)
- ☐ No, I prefer to pull information when needed
- ☐ Other

22. Additional comments or elaboration (on previous answer)

23. Are there any additional insights you'd like to share about when you find it difficult to maintain visibility on an account (during onboarding or while actively working on it)?
